The procedures selected depend on auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the institution's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances.
- b) evaluating the appropriateness of accounting policies used and reasonableness of the accounting estimates made by the management, as well as evaluating the overall presentation of the financial statements.
